

**IN THE CLAIMS:**

Please amend the claims as follows:

1. (Currently Amended)[[:]]      A special ~~Special~~ urban transformation center  
comprising: [[:]] with the purpose to house in its  
a concrete base;  
an interior cabinet comprising:  
    a ventilation grill,  
    double walls of steel and vinyl ester, and  
    at least one access door;  
a transformer for medium or low voltage level;[[:]]  
medium voltage cells;[[:]]  
a low voltage panel;[[:]]  
~~and~~ a telecontrol panel; and[[:]]  
an external enclosure comprising:  
    a body;  
    at least one hollow pillar,  
    a sliding door attached to the body,  
    a roof that includes holes in a lower surface thereof, and  
    closets for housing the low voltage panel and the telecontrol panel;  
wherein the transformer and the medium voltage cells are housed in the interior  
cabinet and are accessible through the at least one access door and the closets have  
doors for accessing the low voltage panel and the telecontrol panel; and

wherein the at least one hollow pillar stands vertically between the base and the roof and provides a conduit that works in tandem with the ventilation grill to evacuate heat generated by the transformer from the interior cabinet to outside of the special urban transformation center through the holes in the lower surface of the roof.  
~~presenting on the exterior side an external enclosure that looks like a telephone cabin, and in the interior containing a cabinet, placed on top of a concrete base that fits into the excavation in the ground, with the internal cabinet erected on top of it, made out of metal sheets and vinyl ester [[:]] that adopts the polygonal configuration, provided with bolts for fixing it to the concrete base, emerging from this base the bolts used for fixing the whole structure that rests upon it, closed in the superior part by four lifting bolts for positioning it.~~

2. (Currently Amended)[[:]]      The special Special urban transformation center[[:]] according to claim 1, wherein when the sliding door of the external enclosure is opened, access is provided to the at least one access door of the interior cabinet for accessing the transformer and the medium voltage cells. ~~characterized by containing closets in the exterior part, below the flat table spaces, used to house the low voltage panel and the telecontrol panel, and at the base of these, at ground level, containing in the inferior space a base for leveling the external structure with the soil, made out of stainless steel, coinciding with the external enclosure, with a horizontal and a vertical step, and presenting an internal / external skeleton, made out of stainless steel, reinforced with crossbeams, as well as the four pillars situated between the base and the hood, and for the zenithal closing there is a roof made of polyester, reinforced with~~

~~fiberglass, which adopts the form of a spherical skullcap with an elliptical form, and at the sides or the largest flanks equipped with the sliding doors and with transparent polycarbonate windows and with special features which permit the placing of vertical urban advertising posters, and which, if opened, give access to the door of the internal cabinet, to reach the room that contains the medium voltage cells, and to the door to reach the room that contains the transformer.~~

3. (Currently Amended)[[:]]      The special Special urban transformation center[[:]] according to claim 1 [[:2]], ~~characterized by wherein the sliding door~~ doors that carry comprises a space for carrying advertisements[[:]] and ~~in which are installed the parts for illumination of the advertisements and, as well as the opening mechanism for refurbishing the advertisement in these doors.~~

4. (Currently Amended)[[:]]      The special Special urban transformation center[[:]] according to claim 1 [[:2]], ~~characterized by wherein the body of the external enclosure further comprises:~~

two narrow sides that include a platform extending in a horizontal direction from each narrow side,

a telephone cabin provided on one narrow side, and

~~incorporating, at the remaining sides of the main body of the special urban transformation center, comprising narrow sides, two telephone cabins and, illuminated by a zenithal light and, situated at a normal and reduced height an antivandalic~~

computer touch screen in ~~with the purpose to establish~~ providing a multimedia information point provided on the other narrow side,

~~below these,~~ wherein the platforms and are situated on each narrow side below the telephone cabin and the computer touch screen to help ~~and support the~~ a public user, serving as well as protection for ~~and protect~~ the closet doors and ~~and for the low voltage panel and the telecontrol panel.~~ ~~In the inferior part of the telecontrol panel two medium voltage cases for entering the cables, cable guiding, are situated.~~

5. (Currently Amended): The special Special urban transformation center[[,]] according to claim 1 [[2]], ~~characterized by wherein the evacuation of the heat that is produced by the transformer, to the exterior through the four pillars that function like chimneys, leaving from the internal closet through a grill situated in the inferior parts of the fronts, and in the superior part of the cabinet, being transported to the outside through drill holes practiced in the lower part of the hood, getting the renewal and the~~ an inflow of air at an atmospheric temperature is provided through an inferior perimetrical entrance located in the a lower part of the sliding door to assist in the evacuation of heat from the interior cabinet ~~doors that are used to carry publicity.~~

6. (New) The special urban transformation center according to claim 1, wherein the roof is elliptical and formed in a spherical skullcap shape.
